A detail-oriented Software Developer specializing in architecting scalable software ecosystems, ranging from high-performance desktop applications to robust internal web systems. Combining a strong foundation in computer science with practical experience in full-stack engineering and system integration, I focus on transforming complex backend logic into seamless, user-centric solutions. With a dedicated interest in artificial intelligence and machine learning, I am passionate about leveraging innovative technologies to optimize operational workflows, enhance data-driven decision-making, and deliver impactful, reliable software.

Work Experiences

Balai Besar POM di Semarang - Semarang, Central Java, Indonesia

Nov 2025 - May 2026

Software Developer Intern

Balai Besar POM di Semarang is a regional regulatory agency in Central Java that oversees and ensures the safety, quality, and efficacy of food and drug products to protect public health.

- Engineered an internal laboratory digitalization system to automate testing workflows and reporting, streamlining data management and significantly improving the operational efficiency of the institution's internal processes.
- Developed a high-performance desktop application focused on accurate, local document processing and integration, enhancing the speed and reliability of daily administrative document handling.
- Implemented supplementary internal web portals, including a comprehensive digital library and an instrument tracking platform, to ensure organized laboratory documentation and facilitate structured monitoring for technicians.

Trans Marga Jateng - Semarang, Central Java, Indonesia

Feb 2024 - Aug 2024

Technology Information Intern

Trans Marga Jateng is a toll road operator in Central Java that manages and maintains regional toll road infrastructure to support connectivity and economic growth.

- Built a centralized employee database portal equipped with an automated CV generation and export feature, significantly optimizing personnel data management and retrieval processes.
- Developed an internal web-based system for official travel order (SPPD) submissions, streamlining administrative workflows and accelerating the request and approval process for internal teams.
- Supported comprehensive corporate asset management initiatives by organizing digital tracking systems for annual office inventory and structuring facility data across toll roads and rest areas.

Education Level

Universitas Negeri Semarang - Semarang, Central Java, Indonesia

Jun 2021 - Jul 2025

Bachelor of Computer Science, 3.91/4.00

- Completed relevant coursework including Software Engineering, Web Programming, Artificial Intelligence, Object-Oriented Programming, Database Systems, and Cloud Computing.
- Winner of 1st Place Essay – Educational Engineering for Character Formation at The 6th International Growth Leadership Program for Youth (GLPY) 2024.
- Actively participated in journal article projects with academic supervisors, focusing on research in machine learning applications and web-based systems.

Organisational Experience

BEM FMIPA UNNES - Semarang, Central Java, Indonesia

Feb 2022 - Jan 2023

Junior Staff of Literacy and Science Department

BEM FMIPA UNNES is a faculty-level student organization that serves as a platform for self-development, advocacy, and the implementation of various programs in academics, scientific literacy, social initiatives, and leadership.

- Assisted in planning and executing literacy and scientific programs to foster academic culture and critical thinking among students.
- Collaborated with senior staff in organizing seminars, discussions, and workshops related to scientific literacy and research development.
- Contributed to the creation of educational content and publications, supporting initiatives that promoted knowledge-sharing within the faculty.
- Actively engaged in team coordination and administrative support, ensuring smooth implementation of divisional activities and events.

Skills, Achievements & Other Experience

- Hard Skills:** Web Development (PHP, Laravel, JavaScript, React, HTML, CSS), Software & Backend (Python, FastAPI, Rust, Tauri, C++, Java), Mobile Development (Kotlin, Android Studio), AI & Data Science (Machine Learning, Deep Learning, AI Prompt Engineering),

Tools & Management (Git/GitHub, Figma, Database Management)

- **Soft Skills:** Analytical Problem-Solving, Cross-Functional Collaboration, Project Ownership, Adaptability & Continuous Learning
- **Achievements** 📌 (2024): Winner of 1st Place Essay – Educational Engineering for Character Formation at The 6th International Growth Leadership Program for Youth (GLPY) 2024
- **Modules Taken** 📌: Cisco
- **Modules Taken** 📌: Dicoding
- **Modules Taken** 📌: Oracle
- **Modules Taken** 📌 (2023): Bangkit Academy 2023 Batch 2
- **Projects** 📌: Lunpia, Atlas, Selaras, Gorena, Employee Database, Business Travel Request Submission, ROSATI Hospital Facilities and Equipment Management
